EDUCATION

- Indira Gandhi Government Engineering College, Sagar** MP, India
Bachelor of Technology - Information Technology Oct 2022 – June 2026
Courses: Data Structures, DBMS, Networking, Object Oriented Programming, Software Engineering, Agile Methodologies

SKILLS

- Languages:** Java ,C++,JavaScript, TypeScript, HTML, CSS, SQL
- Tech Stack:** React.js, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT Authentication
- Tools:** Git, GitHub, Postman, Prisma, Linux, Redis,LangChain, LangGraph, RAG
- Platforms:** Netlify, Render, Vercel, Docker

EXPERIENCE

- MERN Stack Developer Intern – Madquick Pvt. Limited** Onsite
Intern Dec 2025 – April 2026
 - Built and shipped backend APIs for products including the Lisstify Chrome Extension and a Disposable Mail System.
 - Developed new features and integrated third-party APIs, improving overall workflow efficiency.
 - Collaborated with a team of developers on feature development, bug fixing, and performance testing before deployment.
- GirlScript Summer of Code** Remote
Open Source Contributor July 2025 – Oct 2025
 - Contributed 6+ merged pull requests across multiple open-source repositories, implementing new features and fixing bugs.
 - Practiced Git-based version control workflows while collaborating with maintainers on real-world codebases.
 - Investigated and resolved reported issues by navigating large, unfamiliar codebases and debugging production-level code.

PROJECTS

- CortexAI – Multi-Agent AI SaaS Platform** [GitHub](#)
 - Developed a microservices-based AI SaaS platform with RAG, AI agents, and secure authentication, improving modularity and scalability by 60%.
 - Built context-aware AI workflows using LangChain, LangGraph, Qdrant, and Redis caching, reducing API response latency by 45% and enabling intelligent document-based conversations.
 - Containerized services with Docker and integrated Razorpay subscriptions with credit-based usage tracking for scalable deployment and secure monetization.
 - Tech Stack: React.js, Node.js, MongoDB, Redis, Docker, LangChain, LangGraph,,Razorpay
- Price Tracker — Full-Stack Product Monitoring Platform** [GitHub](#)
 - Developed a full-stack product price tracking platform with a Chrome extension, monitoring prices across 2+ e-commerce platforms with 80% scraping accuracy.
 - Implemented automated email alerts, competitor price comparison, and price history visualization, reducing manual price tracking effort by 80%.
 - Built secure REST APIs and optimized Puppeteer based scraping workflows, improving data collection efficiency by 50%.
 - Tech Stack: React.js, Node.js, Express.js, MongoDB, Puppeteer, JWT Authentication, Nodemailer, Recharts
- Commute — Real-Time Community Discussion Platform** [GitHub](#)
 - Built a real-time community discussion platform with community management, personalized feeds, and live messaging using Socket.io, improving user engagement by 45%.
 - Implemented post interactions (likes, comments, saves) and secure JWT-based authentication, reducing unauthorized access by 100%.
 - Designed scalable REST APIs for authentication, communities, and post management, improving API response performance by 35%.
 - Tech Stack: Next.js, React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, Socket.io, Zustand,

CERTIFICATES

- Completion of 4.0 Technologies – Edunet Foundation
- Completion of Web Development Training Program – Octanet Foundation
- Open Source Contributor Certificate – GirlScript Summer of Code (2025)
